The entire risk as to the quality and performance of the program is with you In no event will the author of this tool or any of its partners be liable to you for any damages, including any general, special, incidental or consequential damages arising out of the use or inability to use this program (including but not limited to any loss of profit or savings, loss of data or a failure of the program to operate with any other programs), even if the author of this tool or any of its partners has been advised of the possibility of such damages.. Some questions that might come up My USB stick will not re-mount An alert is popping up telling me to re-attach the stick, but this doesn't help.. Since we are working on different platforms the sticks might be NTFS-formatted No problem so far, there are several resources out to the web describing to accomplish this task, e.. This can happen when the USB stick is not cleanly unmounted from the Windows PC.. • • I personally have chosen the more pragmatic way, just open a terminal and issue some mount commands like: macbook:~ uwe$ sudo umount /Volumes/UNTITLED macbook:~ uwe$ sudo mount -t ntfs -o rw,auto,nobrowse /dev/disk3s1 ~/ntfs-volume However, tired of typing this over and over, I have written Mounty to accomplish exactly this - but in a much more convenient fashion.. Suddenly all my files disappeared - please help! This is usually happen when not all files are written properly due to an unmount operation not finishing.. Sometimes the files are grayed out and cannot be modified anymore This is because the file has extended attributes, refer to for further explanation.. The NTFS partition might be marked as 'dirty' and the Apple NTFS driver cannot recover from that situation.. Please let me know if this tool is also useful to you; and do not hesitate to a question that might appear using Mounty. 773a7aa168 Tint Tek 2020 Video
